

Yago Russo

Full-stack Software Engineer

yagrrusso@gmail.com · 5551986824203

GitHub: <https://github.com/YaGRRusso> · **LinkedIn:** <https://www.linkedin.com/in/yago-russo/>

I work as a Full-stack Software Engineer with a focus on strict end-to-end TypeScript and scalable architectures. I developed the frontend of a platform from scratch using a multi-app monorepo with its own UI library and tooling, and structured the backend in a serverless monorepo on AWS Lambda...

SKILLS

Backend: Nest, GraphQL, Node, Fastify, Cheerio, Prisma, Swagger

Data: Gemini, MongoDB, Elastic Search, MySQL, Typesense, DynamoDB, PostgreSQL

DevOps: Docker, Serverless, Claude, Amazon Web Services, Lambda, Cypress, Vitest

Frontend: Next, React, Tailwind, Tanstack, Astro, Radix, Styled Components

Languages: Javascript, TypeScript, Jest, Bash, Java, Python, CSS

EXPERIENCE

Full Stack Developer

Droz · Apr 2023 – May 2026

I developed the entire frontend from scratch, structuring a monorepo that includes four products and shared utility libraries, including a UI library based on Shadcn, using React, TypeScript, Vite, Tailwind, Radix, and i18next. I migrated the legacy system from Next.js to pure React, simplifying...

Front End Developer

Aktie Now · Jan 2023 – Mar 2023

I developed Help Center projects on Zendesk for major Brazilian clients, using HTML, CSS, and JavaScript to create responsive and intuitive interfaces. I built an internal platform based on React, TypeScript, Vue, and Vite, integrated with Tailwind, which allows the team to insert placeholders...

Junior Front End Developer

Aktie Now · Apr 2022 – Dec 2022

I developed Help Center pages in Zendesk using HTML, CSS, and JavaScript, adapting the interface to meet the needs of large Brazilian clients. I worked closely with CX teams to map support flows and ensure visual consistency and responsive functionality. I implemented customizations that...

EDUCATION

Systems Analysis and Development

Cesuca · Jan 2023 – Dec 2025

I completed a bachelor's degree in Systems Analysis and Development at Cesuca, where I developed applications using HTML, CSS, JavaScript, and TypeScript. I implemented APIs with Node, managed PostgreSQL and MySQL databases, applied Bootstrap and Tailwind, and used Git in agile projects.

Computer Technician for Internet

Ifsul · Jan 2017 – Dec 2020

I completed the Technical degree in Internet Computing at IFsul, where I gained a solid foundation in full stack development using HTML, CSS, JavaScript, Java, TypeScript, React, Node, Spring Boot, PHP, MySQL, and PostgreSQL, as well as Git version control and styling with Bootstrap and Tailwind....

PROJECTS

Fullstack Portfolio Manager with AI (<https://github.com/YaGRRusso/yago-russo>)

I developed a full stack portfolio in React and TypeScript, using Vite, Tailwind, and DaisyUI for the visual layer, and Node/Nest with GraphQL, Mongoose, and MongoDB on the backend. I integrated AI via Open Router to generate personal information from contexts extracted by API, validating the...

Portfolio (<https://github.com/YaGRRusso/yagrrusso.github.io>)

I developed a portfolio website using Next.js /16 with static export (SSG), ensuring free hosting and instant loading. I integrated skill, project, and experience data via GraphQL Code Generator, strictly typed everything with TypeScript and validated forms with Zod. I implemented bilingual...

Leaked Cards (<https://github.com/YaGRRusso/leaked-cards>)

I developed "Cartões Vazados," a responsive site built with Astro integrated with React and TypeScript, using DaisyUI for a consistent UI and i18next for internationalization. I created a form that simulates card verification, adding timers and analysis screens to build anticipation before...
